appendChild() vs append()

appendChild() : bt2bl argument wahed bs w lw edetaha aktr mn argument msh bt2rah w msh bt2bl strings y3ne ay haga ben quotations msh bt2blaha.

append():bt2bl aktr mn argument w bt2bl string.

HTMLCollection vs NodeList

El ekhtlaf ma benhom en el html collection dynamic lakn el nodelist static y3ne lma n-execute el html collection bttgdd 3latol w bt-add el element elly zwdnah lakn el nodelist static bmograd ma 3mlt execute mara btfdl bnfs el output bta3 awl mara hta lw hsl ay update

These two methods return the **HTMLCollection** object.

1. **getElementByTagName()**
2. **getElementsByClassName()**

Methods that return **NodeList** are:

1. **getElementsByName()**
2. **querySelectorAll()**
